1.1	2024-09-27
2.0	2024-12-13

Revision History

Date	Version	Description
Nov 27, 2023	0	■ Enactment
May 22, 2024	1.0	■ Article 2 (Scope): LED business unit → CSS team ■ Article 3 (Definitions) - Raw material composition chart → Material composition data (definition was also modified) ■ Article 5 (Standards for Environmental Substances in Products) A. Restricted Substances - Removal: MOAH (moved to Article 6) - Addition: Red P, DIOP, 1,3-benzendiol, PAHs C. Priority Management Substances other than RoHS Substances - Addition: F (fluorine) D. Substances with potential risks - Removal: Red P (moved to A. Restricted Substances) - Formaldehyde → Formaldehyde emissions ■ Article 6 (Standards for Environmental Substances in Packaging) - Addition: MOAH, MOSH ■ Appendix-1. (e-CIMS Management Standards) E. Certification Process - Raw material composition chart → Material composition data (definition was also modified)
Sep 27, 2024	1.1	Removal : Red P
Dec 13, 2024	2.0	■ Article 2 (Scope): - Define the scope of fabrication (FAB) materials included in this standard ■ Article 3 (Definitions) - Addition: 7. Article ■ Article 5 (Standards for Environmental Substances in Products) A. Restricted Substances - Addition : Formaldehyde (moved from D. Substances with potential risks), Mineral oil (moved from Article 6) C. Priority Management Substances other than RoHS Substances - Addition : CAS No and threshold limits - Requirement for PFAS declaration when total F > 50 mg/kg was added D. Substances with potential risks - Addition: CLP substances, PVC additives, Aromatic brominated flame retardants - Removal : Formaldehyde

		■ Article 6 (Standards for Environmental Substances in Packaging) - Removal : Mineral oil ■ Appendix-2.(Exemptions of Control of Substances) - 7(a), 7(c) Expiration date: 2024.7.21 → Valid (requested for renewal)

Appendix

Annex

SAMSUNG

Chapter 1 General Provisions

Article 1 (Purpose)

The Purpose of the [DS] Standards for Control of Substances used in products (Registration No.: DS-ERU-026, and hereinafter referred to as the "Standard") is to ensure that semiconductor products and parts sold by the DS Division of Samsung Electronics (hereinafter referred to as the "Company") do not contain harmful substances that negatively affect human health and the environment and to develop products and parts that comply with environmental regulations.

Article 2 (Scope)

1. Scope of Application

A. In principle, the standard applies to all products and parts developed for sale in the DS Division, regardless of where they are sold. (For CSS team, see the CSS's standard)

* Product: All finished products the Company develops for sale (including outsourced finished products and purchased goods)
  e.g., Module, SSD, Card, UFD products, PKG components, etc.
* Part: All parts that make up the Company's products (including raw materials, components, and packaging materials)
  e.g., PCB, Solder paste, Resistor, etc.

For fabrication (FAB) materials, wafer, chip in wafer, target, and plating are included in the scope of this standard. Other FAB materials used in the manufacturing process that do not remain in the final product are not subject to this standard.

B. The standard shall be reflected in the part development approval (mass production) and product development rules within the DS Division. For products produced at overseas business sites, the timing and criteria for implementation shall be reflected in the rules within the business unit.

C. For substances requiring environmental management not stipulated in the standard, the reasons shall be clarified and reflected in this rule with the approval of the head of the affiliated department and the consensus of the Head of the Climate Strategy Group.

D. Special cases that cannot be reflected in the standard and special cases that cannot comply with some items of the standard shall be agreed upon by the Head of the Global CS Center.

2. Exclusions

A. The standard does not apply to substances used during the process that do not remain in the final product (gases/chemicals, lubricants, coolants, other auxiliaries etc.).

B. Voluntary banned substances for which no alternative exists shall be determined as an exception in consultation with the Climate Strategy Group and the Global CS Center, and the application shall be suspended until an alternative is developed.

Article 3 (Definition)

1. Substances requiring environmental management

Substances which are restricted and controlled by SEC, due to their negative effects on the environment and the health

2. Classification of substances requiring environmental management

A. Restricted substances: Substances whose use within products is limited by national laws or conventions and for which the Company voluntarily reduces, considering their impact on the environment and human health. (Restricted substances under RoHS are classified according to the substances regulated by the EU RoHS Directive.)

B. Substances with potential risk: Substances that require ongoing monitoring due to anticipated future regulations or ongoing client requests for restricted use

3. Exemptions

The exemptions for restricted substances will primarily adhere to the determined matters by the EU RoHS Directive and other environmental regulations that recognize exemptions. If the use is inevitable for maintaining the quality and performance of the Company's products, such instances are classified as exemptions, and their implementation is deferred.

4. Certification of hazardous substances in products and parts

This is the process of confirming through actual measurement or related documents that the hazardous substances in products and parts comply with the management standards of the standard, thereby recognizing that the requirements of environmental regulations are satisfied. If the Company’s management standards are not met, approval for the product or part cannot proceed.

5. Product/Part approval

It is the process of evaluating the quality and reliability of products and parts by the Company's standardized review criteria and formally recognizing the evaluation results; the approval unit is operated as "Product or part code + Maker abbreviation + Maker part No."

6. Homogeneous materials

It refers to the smallest component unit of a part made of a single material and a material of such uniform composition that cannot be separated into different materials by physical methods such as cutting, grinding, and polishing.

7. Article

An object which during production is given a special shape, surface or design which determines its function to a greater degree than its chemical composition

8. Threshold Limit

It refers to the maximum permissible concentration for a restricted substance in the analysis of a regulated substance, considering analytical errors and impurities; the threshold limit represents the result of a chemical analysis. In the case where the result exceeds the threshold limit, the product is prohibited from being supplied to the Company as it is considered an intentional use of a regulated substance. In addition, prohibited substances must not be used intentionally or unintentionally (when

expressing threshold limits. In this standard, "total" means that the sum of the listed items must comply with the threshold limit, and "each" means that each substance must comply with the threshold limit).

9. Chemical analysis

It refers to an analysis of inorganic substances by ICP, IC, UV/VIS, and organic substances by GC/MS equipment with high precision and accuracy, unlike the screening analysis (XRF analysis, etc.), which analyzes the approximate concentration

* Organic: "Organic compounds," collectively referring to carbon compounds such as plastics, rubber, ink, etc.
* Inorganic: "inorganic compounds," collectively referring to compounds other than organic matters, such as metals, ceramics, etc.

10. Chemical analysis data (test report)

An analytical test report issued by a laboratory accredited under ISO 17025 in accordance with the international standard testing method

11. Material composition data

Data or document on the chemical composition, CAS No. (EC No.), and content (e.g., Material Safety Data Sheet (MSDS), Mill Sheet, Material Declaration, etc.)

* Since a full patterned wafer meets the definition of a finished product under the OSHA Hazard Communication standard (29 CFR 1910.1200), a declaration (e.g., MSDS no issuance statement) can be used instead.

11. Outsourced finished products

Finished products, which are produced at external manufacturing facilities; including ODM, OEM, and foundry.

* ODM (original development and manufacturing): A method of selling finished products developed and produced by a partner company to the market by attaching the Company's trademark (purchased goods) or changing only the appearance specifications (face change); in general, the ODM is responsible for development, part approval, import inspection, and shipment inspection.
* OEM (original equipment manufacturing): A method in which the finished product is manufactured by a partner company according to the technology and specifications provided by the Company and sold to the market with the Company's trademark; in general, the OEM is responsible for import inspection and shipment inspection.
* Toll manufacturing: A processing or assembly of materials from the Company into products required by the Company by a supplier, which is the finished product outsourcing company

12. Purchased goods

It refers to products developed by ODM and OEM companies or products developed by the Company, which are then produced through ODM and OEM companies and sold with the Company’s brand attached.

13. Volatile organic compounds (VOC)

Petrochemicals, organic solvents, or other substances with high vapor pressure (>10.3 kPa) that may have a harmful effect on workers and the workplace

14. EU SCIP

SCIP (substances of concern in articles as such or in complex objects (products)) is a database for information on the REACH SVHC candidate substances in articles or complex products established under the EU Waste Framework Directive (2018/851).

15. Eco-Partner

It refers to partner companies that use substances that meet the Company's management standards for products, parts, raw materials, etc., and have an organization and management system in place to appropriately manage such substances, so that they can do business with the Company

Article 4 (Operation and Management Standard)

1. Operation

A. The Company manages the substances requiring environmental management by classifying them into restricted substances and substances with potential risks and prohibiting the use of such substances from the time indicated in the "Effective date." However, in the case when there is no alternative method, the management method should be postponed until the alternative method is developed and applied and then implemented.

B. The management standards and methods of the standard shall be updated regularly, and any changes shall be notified to relevant departments and partner companies before being implemented.

C. Provide the maximum permissible concentration that can be measured due to analytical error or impurities in the raw materials, etc., to clarify the management standards for proof of non-use.

SAMSUNG

Chapter 2 Standards for Environmental Substances

Article 5 (Standards for Environmental Substances in Products)

1. This standard applies to the unit of homogeneous materials in parts of being supplied by suppliers.
- Homogeneous material which cannot be mechanically dissembled further into single materials or articles.

2. List of Control of substances in products.
- For a detailed list of substances and CAS No, refer to Annex I

A. Restricted Substances

Substance name* 1)		Scope	Threshold Limit	Effective date	References
Cadmium and its compounds (Cd)		All parts	80 mg/kg	January 2005	EU/Korea/China RoHS; OSPAR Priority Chemicals; Japan J-MOSS; US/CA SB-20/50; California Proposition 65; the Electrical Appliances and Consumer Products Safety Control Act of Korea
Lead and its compounds (Pb)		All parts	800 mg/kg	January 2005	EU/Korea/China RoHS; California Proposition 65; OSPAR Priority Chemicals; Japan J-MOSS; US/CA Waste recycling; US CPSIA; EU REACH The Electrical Appliances and Consumer Products Safety Control Act of Korea
Mercury and its compounds (Hg)		All parts	800 mg/kg	January 2005	EU/Korea/China RoHS; OSPAR Priority Chemicals; Japan J-MOSS; US/CA Waste recycling; California Proposition 65
Hexavalent chromium and its compounds (Cr6+)		All parts	800 mg/kg *2)	January 2005	EU/Korea/China RoHS; OSPAR Priority Chemicals; Japan J-MOSS; US/CA Waste recycling, California Proposition 65
PBBs, PBDEs		All parts (Organic)	Prohibited	February 2005	EU RoHS; Japan J-MOSS; POPs OSPAR Priority Chemicals; China RoHS; Korea RoHS; California Proposition 65
Phthalates	BBP, DBP, DEHP, DIBP	All parts (Organic)	Prohibited	July 2018	EU RoHS/REACH; California Proposition 65
	DINP, DIDP, DnOP, DnHP,	All parts (Organic)	Prohibited	July 2019	Voluntary reduction

Substance name* 1)		Scope	Threshold Limit	Effective date	References
Cadmium and its compounds (Cd)		All parts	80 mg/kg	January 2005	EU/Korea/China RoHS; OSPAR Priority Chemicals; Japan J-MOSS; US/CA SB-20/50; California Proposition 65; the Electrical Appliances and Consumer Products Safety Control Act of Korea
Lead and its compounds (Pb)		All parts	800 mg/kg	January 2005	EU/Korea/China RoHS; California Proposition 65; OSPAR Priority Chemicals; Japan J-MOSS; US/CA Waste recycling; US CPSIA; EU REACH The Electrical Appliances and Consumer Products Safety Control Act of Korea
Mercury and its compounds (Hg)		All parts	800 mg/kg	January 2005	EU/Korea/China RoHS; OSPAR Priority Chemicals; Japan J-MOSS; US/CA Waste recycling; California Proposition 65
Hexavalent chromium and its compounds (Cr6+)		All parts	800 mg/kg *2)	January 2005	EU/Korea/China RoHS; OSPAR Priority Chemicals; Japan J-MOSS; US/CA Waste recycling, California Proposition 65
	DMEP, DIPP, nPIPP, DnPP, DCHP				
	Diisooctyl phthalate (DIOP)	All parts (Organic)	1,000 mg/kg	May 2024	France waste-generating products leg.
PCBs, PCTs, PCNs		All parts	Prohibited	May 2004	POPs; EU REACH; Japan Chemical Law
Asbestos and its compounds		All parts	Prohibited	May 2004	EU REACH
Short-chain chlorinated paraffins (SCCPs)		All parts	Prohibited	April 2011	EU REACH, POPs
Medium-chain chlorinated paraffins (MCCPs)		All parts	1,000 mg/kg	July 2023	Voluntary reduction
Organotin compounds	TBT, TPT, DBT	All parts	Prohibited	January 2012	EU REACH; Voluntary reduction
	DOT				Voluntary reduction
PFOS, and its salts * 3)		All parts	Prohibited	July 2023	POPs; Voluntary reduction
PFHxS, and its salts		All parts	Prohibited	October 2022	Swiss ORRChem; POPs
PFOA, and its salts		All parts	Prohibited	July 2023	POPs
LC PFCA, and its salts (C9~C14)		All parts	Prohibited	October 2022	EU REACH, Swiss ORRChem
TCEP, TDCPP		All parts (organic)	1,000 mg/kg each	January 2019	USA D.C. Flame Retardant

SAMSUNG

Substance name* 1)		Scope	Threshold Limit	Effective date	References
Cadmium and its compounds (Cd)		All parts	80 mg/kg	January 2005	EU/Korea/China RoHS; OSPAR Priority Chemicals; Japan J-MOSS; US/CA SB-20/50; California Proposition 65; the Electrical Appliances and Consumer Products Safety Control Act of Korea
Lead and its compounds (Pb)		All parts	800 mg/kg	January 2005	EU/Korea/China RoHS; California Proposition 65; OSPAR Priority Chemicals; Japan J-MOSS; US/CA Waste recycling; US CPSIA; EU REACH The Electrical Appliances and Consumer Products Safety Control Act of Korea
Mercury and its compounds (Hg)		All parts	800 mg/kg	January 2005	EU/Korea/China RoHS; OSPAR Priority Chemicals; Japan J-MOSS; US/CA Waste recycling; California Proposition 65
Hexavalent chromium and its compounds (Cr6+)		All parts	800 mg/kg *2)	January 2005	EU/Korea/China RoHS; OSPAR Priority Chemicals; Japan J-MOSS; US/CA Waste recycling, California Proposition 65
PIP(3:1)		All parts (organic)	Prohibited	July 2021	US TSCA PBT
TBBP-A		All parts (organic)	900 mg/kg	January 2008	Voluntary reduction
HBCDD		All parts	Prohibited	October 2015	Norway Product Regulation EU REACH
Beryllium (Be) and its compounds		All parts	1,000 mg/kg	January 2013	Voluntary reduction
Cobalt dichloride (CoCl2)		All parts	Prohibited (Co: 1,000 mg/kg	June 2011	Voluntary reduction
VOCs	Benzene	All parts	Prohibited	January 2019	Voluntary reduction
POPs	HCBD, HCB, HCDD, PCDF, Dechlorane Plus, Penta-chlorobenzene, UV-328, methoxychlor	All parts	Prohibited	April 2004	POPs
	2,4,6-TTBP, PCTP, DecaBDE	All parts	Prohibited	December 2021	US TSCA PBT

Substance name* 1)		Scope	Threshold Limit	Effective date	References
Cadmium and its compounds (Cd)		All parts	80 mg/kg	January 2005	EU/Korea/China RoHS; OSPAR Priority Chemicals; Japan J-MOSS; US/CA SB-20/50; California Proposition 65; the Electrical Appliances and Consumer Products Safety Control Act of Korea
Lead and its compounds (Pb)		All parts	800 mg/kg	January 2005	EU/Korea/China RoHS; California Proposition 65; OSPAR Priority Chemicals; Japan J-MOSS; US/CA Waste recycling; US CPSIA; EU REACH The Electrical Appliances and Consumer Products Safety Control Act of Korea
Mercury and its compounds (Hg)		All parts	800 mg/kg	January 2005	EU/Korea/China RoHS; OSPAR Priority Chemicals; Japan J-MOSS; US/CA Waste recycling; California Proposition 65
Hexavalent chromium and its compounds (Cr6+)		All parts	800 mg/kg *2)	January 2005	EU/Korea/China RoHS; OSPAR Priority Chemicals; Japan J-MOSS; US/CA Waste recycling, California Proposition 65
DMF (Dimethyl fumarate)		All parts	0.1 mg/kg	May 2009	EU 2009/251/EC, EU REACH
PCP (pentachlorophenol) and its compounds		All parts	Prohibited	May 2024	EU REACH; POPs
Ozone-depleting substances (ODS)	CFCs, HCFCs, HBFCs, HFCs, Halons, etc.	All parts	Prohibited	August 2023	Montreal Protocol; EU ODS /F-gas. US Clean Air Act;
Radioactive materials		All parts	Prohibited	December 2021	Voluntary reduction
DBDPE (Decabromo-diphenyl-ethane)		All parts	Prohibited	September 2023	EU REACH; Canada PCTSR
Diisooctyl phthalate (DIOP)		All parts	1,000 mg/kg	May 2024	France Anti-Waste and Circular Economy law
1,3-benzenediol (resorcinol)		All parts	1,000 mg/kg	May 2024	France Anti-Waste and Circular Economy law
PAHs		All parts	1,000 mg/kg each	May 2024	IEC 62474
Formaldehydes		All parts	0.08mg/m3	May.2026	EU REACH
Mineral Oil	MOAH (1~7 aromatic rings) MOSH (C16~C35)	Printing ink in papers *4)	Prohibited	May 2024	France waste-generating products leg.

* Note 1) For client-specified substances, exemptions can be made for the products for the corresponding client.

2) The test result of the metal coating by IEC 62321-7-1 is negative or less than 0.1 ug/cm2, and it is acceptable.

3) PFOS chemical formula: C8F17SO2X [X = OH, Metal salt(O-M+), derivatives containing halides, amides, and polymers

4) Only paper from packaging materials and printed material (manuals, warranties, etc.) for consumers

B. RoHS substances

The substances listed below are restricted substances regulated by the EU RoHS Directive, and detailed analytical data must be submitted for the listed 10 restricted substances

1) Cadmium and its compounds

2) Lead and its compounds

3) Mercury and its compounds

4) Hexavalent chromium and its compounds

5) PBBs 6) PBDEs

7) BBP 8) DBP 9) DEHP 10) DIBP

C. Priority Management Substances other than RoHS Substances

The following substances are regulated by regulations other than the EU RoHS Directive. For the substances subject to management as listed below, detailed analytical data[Note 1)] must be submitted.

Substance name		**Scope**	**Threshold Limit**	**Effective date**	**References**
Halogen	Br	7726-95-6	All parts	900 mg/kg	Halogen Free
	Cl	7782-50-5		900 mg/kg	
	Br + Cl	-		1500 mg/kg	
	F	7782-41-4		50 mg/kg * 2)	EU PFAS (Proposal for a restriction)

*Note 1) A chemical analysis report for halogen substances may be accepted for materials containing materials containing halogen substances.

2) When total F > 50 mg/kg, PFAS declaration must be submitted additionally for part approval (if not, the part approval can be rejected)

D. Substances with potential risks

Substance lists below are expected to be regulated in the future. Thus, if a substances contains over threshold, it needs to be monitored.

Substance name	Scope	Note
EU REACH SVHC Candidates Note 1)	All parts	http://echa.europa.eu/web/guest/candidate-list-table
Substances restricted under EU REACH	All parts	https://echa.europa.eu/substances-restricted-under-reach
Substances permitted by EU REACH	All parts	https://echa.europa.eu/authorisation-list
IEC 62474 substances Note 2)	All parts	https://std.iec.ch/iec62474/iec62474.nsf/Index?open&q=060313
Endocrine disruptor	All parts	Manage as EU SVHC
Indium Phosphide	All parts	CAS No: 22398-80-7
Triclosan	All parts	CAS No: 3380-34-5
PFAS (Per- and poly fluoroalkyl substances)	All parts	https://echa.europa.eu/documents/10162/f605d4b5-7c17-7414-8823-b49b9fd43aea
Br·Cl·P Compounds	Plastic, PCB	Sweden chemical tax Note 3)
CLP substances (Annex VI, Table 3)	All parts	https://echa.europa.eu/information-on-chemicals/annex-vi-to-clp
PVC additives	All parts	INVESTIGATION REPORT ON PVC AND PVC ADDITIVES (ECHA, Ver 1.0), Annex1
Aromatic brominated flame retardants	All parts	https://echa.europa.eu/documents/10162/89b22150-28d1-a745-5f8d-29791433dd52

* Note

1) EU REACH SVHC candidate substances are updated annually (twice a year). Decide whether to use or not by checking the latest list from the European Environment Agency, the managing agency for REACH.

* REACH SVHC (Substances of Very High Concern) candidates

Substances regularly declared by the EU REACH as having the same as or equivalent hazards to CMRs (carcinogenic, mutagenic, and reproductive toxicity), PBTs (persistent, bioaccumulative, toxicity), and vPvBs (very persistent, very bioaccumulative), and are subject to an information disclosure or notification obligation if they contain more than 0.1% by weight of the part.

→ CMRs (Carcinogenic, Mutagenic, Reproductive toxicity), PBT (Persistent, Bioaccumulative, Toxicity), vPvB (very Persistent very Bioaccumulative)

2) The use of IEC62474 substances must be reported. See the IEC 62474 website for a list of substances and thresholds.

3) The operation division shall limit the use of target substances for plastic parts weighing more than 25 grams and all PCB parts according to the target deduction rate.

- Tax 50% deduction: Manage additive Br·Cl compounds below 0.1% by weight
- Tax 90% deduction: Manage additive Br·Cl·P compounds and reactive Br·Cl compounds below 0.1% by weight

Article 6 (Standards for Environmental Substances in Packaging)

1. Definition of packaging materials

Packaging material means the materials delivered to customer and are used for the storage, protection, handling and transport of products.

2. Standards for Environmental Substances in Packaging Materials

- Related regulation: European Parliament and Council Directive 94/62/EC
- mg/kg by weight (By packaging weight)
- For packaging materials which no respective threshold limits are provided, apply the standards in Article 5 (Standards for Environmental Substances in Products)
- For a detailed list of substances and CAS No, refer to Annex II

Substance name	**Scope**	**Threshold Limit**	**Effective date**
Cadmium, lead, mercury, Hexavalent chromium	Packaging materials shipped to market	Total 80 mg/kg	May 2004
Ozone-depleting substances		Prohibited	May 2004
PVC		Prohibited	May 2004
Brominated flame retardant		Br 900 mg/kg	Feb. 2005
Cobalt dichloride	Silica gel, humidity indicator	Prohibited	Jun. 2011

SAMSUNG

Addendum

A. The results of measuring hazardous substances in newly developed and mass-produced parts shall be preserved in accordance with the document retention period standard of the DS Division.

B. The Company should be able to provide results obtained from partner companies and internal measurement when requested by governments and customs of countries where products are exported, clients, and stakeholders.

C. This rule shall be enforced immediately after registration.

SAMSUNG

Appendix-1: e-CIMS Management Standards

1. Eco-Partner Certification for Suppliers

A. Purpose

All partner companies with whom Samsung Electronics does business shall manage to eliminate harmful substances in products, parts, and raw materials, and improve them in an eco-conscious way, and establish an environmental quality management system that can fully respond to environmental regulations. An Eco-Partner certification refers to a partner company that has established a management process to ensure that products and parts (raw materials) supplied to Samsung Electronics do not contain environmentally harmful substances and is recognized as being able to do business with Samsung Electronics on an ongoing basis.

* Eco-Partner: Environmental management activities that consider economy and the environment (Prefix of the words “ecology” and “economy”)

B. Scope of Application

This applies to all partner companies that supply products and parts developed for the purpose of sales by Samsung Electronics.

* Molds, equipment, process consumables, software, client-specified parts, third-party branded products, mock-up trading partners, and Samsung affiliates are not subject to management.

C. Certification Criteria

The certification is granted by evaluating and certifying partner companies’ environmental management systems and compliance with the management standards of Samsung Electronics' [DS] Standards for Control of Substances Used in Products, and is valid for two years.

However, partner companies included in Paragraph D may exclude environmental management system assessments.

1) Certification criteria for general partner companies

Category	Evaluation item		Expiration
	Standards for Environmental Substances in Products	Environmental management system[1)]	
Certified	Appropriate	80 and higher	2 years
Not certified	Appropriate	Below 80	Business not allowed
	Inappropriate	-	

* Re-evaluation penalty: First - Re-evaluation within 1 month; Second - Trade suspension for 6 months; Third - Permanent trade suspension

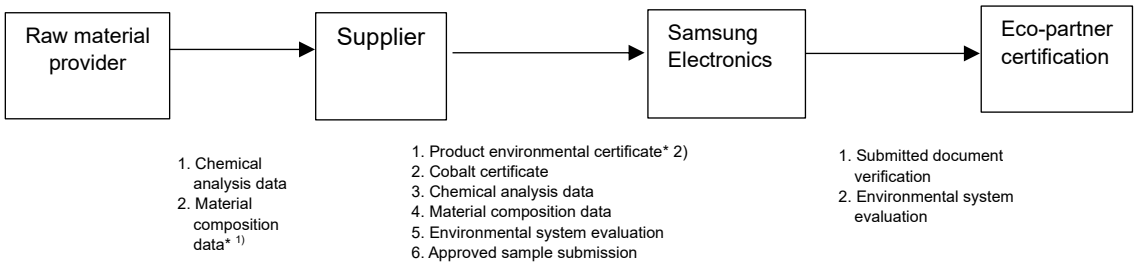
1) Documentation + on-site evaluation for new partner companies; only documentation evaluation for renewals

D. Environmental Management System Assessment Exclusions

- Partner companies such as domestic/overseas global conglomerates stipulated in Article 8 Paragraph 5 of the standard for Partner Company Management (00Q3-0015K)
- Domestic conglomerates: Companies that are major shareholders, owning 30% or more of their stock, either directly or indirectly, and are enterprise groups subject to the limitations on mutual investment (announced by the Fair Trade Committee) or corporations (including foreign corporations) whose total assets exceed the threshold for designation as an enterprise group subject to the limitations on mutual investment
- Overseas conglomerates: Forbes 2000 or Fortune 500 companies

- Partner companies in the semiconductor industry (IC supply, wafer, target, plating, fab materials)
- Partner companies without manufacturing plants, such as warehouses, agents, designers, and purchasing agencies
- Outsourced toll-processing companies (Only to whom the Company provides 100% of the materials)
- Partner companies who provide only service materials

E. Certification Process



* Note

1) Material composition data: Data or document on the chemical composition, CAS No. (EC No.), and content (e.g., Material Safety Data Sheet (MSDS), Mill Sheet, Material Declaration, etc.)

* Since a full patterned wafer meets the definition of a finished product under the OSHA Hazard Communication standard (29 CFR 1910.1200), a declaration (e.g., MSDS no issuance statement) can be used instead.

2) Product environmental certificate: A document that guarantees that the hazardous substance information submitted to Samsung Electronics is true; it is valid for one year but is automatically extended if there is no disagreement between the two companies until one month before expiration.

SAMSUNG

Appendix-2: Exemptions of Control of Substances

1) RoHS Substances exemption list: Refer to the eCIMS system post for details

* Product categories are based on Annex I of the EU RoHS Directive: 1 (Large household appliances), 2 (Small household appliances), 3 (IT and telecommunications equipment), 4 (Consumer home appliances), 5 (Lighting equipment), 6 (Electrical and electric tools), 7 (Toys, leisure and sports equipment), 8 (Medical devices), 9 (Monitoring and control instruments), 10 (Automatic dispensers), 11 (Other EEE)

Exemptions		**Product Category**	**Expiration date**
7(a)	Lead contained within high melting temperature solder consisting of more than 85wt% lead (i.e., Lead-based alloys containing more than 85 wt% lead)	1~7, 10, 11	Valid - requested for renewal
7(c)-I	Electrical and electronic components, including ceramics (excluding dielectric ceramics in capacitors) and lead in glass (e.g., Piezoelectric devices or glass or ceramic matrix components)	1~7, 10	Valid - requested for renewal

2) Exemption list out of RoHS Substances

Exemptions		**Product Category**	**Expiration Date**
P-1	Packaging materials made of lead crystal glass In the following cases, exceeding the standard concentration of glass packaging is accepted as an exception (Commission Decision 2001/171/EC): No intentional input of lead, cadmium, mercury, or hexavalent chromium in the manufacturing process Exceeding the concentration limit due to the addition of recycled material	Packaging materials	-

SAMSUNG

Annex

Annex I. (Article 5) List of Environmental Substances in Products

A. Restricted Substances

Substance name	Chemical substance example	CAS No
10 RoHS substances	See Annex I B. List of RoHS substances	
Non-RoHS phthalates	Bis(2-methoxyethyl) phthalate; Di(2-methoxyethyl phthalate (DMEP)	117-82-8
	Di-“isodecyl” phthalate (DIDP)	26761-40-0
	Di-“isononyl” phthalate (DINP)	28553-12-0
	Dicyclohexyl phthalate (DCHP)	84-61-7
	Dihexyl phthalate (DnHP); Di-n-hexyl phthalate	84-75-3
	Diisopentyl phthalate (DIPP)	605-50-5
	Di-n-octyl phthalate (DNOP)	117-84-0
	Dipentyl phthalate (DPP or DnPP)	131-18-0
	N-pentyl-isopentyl phthalate (nPIPP)	776297-69-9
	Diisooctyl phthalate (DIOP)	27554-26-3
PCBs, PCTs, PCNs	Polychlorinated bipheyls (PCB)	1336-36-3
	Polychlorinated terpheyls (PCT)	61788-33-8
	Polychlorinated naphthalenes (PCN)	70776-03-3
	Trichloronaphthalenes	1321-65-9
	Tetrachloronaphthalenes	1335-88-2
	Pentachloronaphthalenes	1321-64-8
	Octachloronaphthalenes	2234-13-1

B. RoHS substances

Substance name	Chemical substance example	CAS No
Cadmium and its compounds (Cd)	Cadmium	7440-43-9
	Cadmium alloys	-
	Cadmium oxide	1306-19-0
	Cadmium sulphide	1306-23-6
	Cadmium carbonate	513-78-0
	Cadmium chloride	10108-64-2
	Cadmium nitrate	10325-94-7
	Cadmium nitrate tetrahydrate	10022-68-1
	Cadmium sulphate	10124-36-4
	Cadmium sulphate	31119-53-6
	Cadmium stearate	2223-93-0
	Cadmium fluoride	7790-79-6
	Other cadmium compounds	-
Lead and its compounds (Pb)	Lead(II)metaborate	10214-39-8
	Silicic acid, lead salt	11120-22-2
	Lead antimonite	13510-89-9
	Lead hydrogen arsenate	7784-40-9
	Lead(II)arsenite	10031-13-7
	Lead sulfochromate yellow (C.I. Pigment Yellow 34) This substance is identified in the Colour Index by Colour Index Constitution Number, C.I. 77603.	1344-37-2
	Lead molybdate	10190-55-3
	Calcium plumbate	12013-69-3
	Tetramethyl lead	75-74-1
	Tetraethyllead	78-00-2
	Trilead bis(carbonate)dihydroxide	1319-46-6
	Lead selenide	12069-00-0
	Lead titanium trioxide	12060-00-3
	Lead sulfate; sulphuric acid, lead salt	15739-80-7
	Lead chromate	7758-97-6
	Lead(II) bis(methanesulfonate)	17570-76-2
	Lead dipicrate	6477-64-1
	Lead styphnate	15245-44-0
	Trilead diarsenate	3687-31-8
	Lead chromate molybdate sulphate red (C.I. Pigment Red 104) This substance is identified in the Colour Index by Colour Index Constitution Number, C.I. 77605.	12656-85-8
	Pyrochlore, antimony lead yellow This substance is identified in the Colour Index by Colour Index Constitution Number, C.I. 77588.	8012-00-8
	Lead titanium zirconium oxide	12626-81-2
	Silicic acid (H2Si2O5), barium salt (1:1), lead-doped with lead (Pb) content above the applicable generic concentration limit for ’toxicity for reproduction’ Repr. 1A (CLP) or category 1 (DSD); the substance is a member of the group entry of lead compounds, with index number 082-001-00-6 in Regulation (EC) No 1272/2008	68784-75-8
	Lead oxide sulfate	12036-76-9
	Acetic acid, lead salt, basic	51404-69-4

	[Phthalato(2-)]dioxotrilead	69011-06-9
	Dioxobis(stearato)trilead	12578-12-0
	Pentalead tetraoxide sulphate	12065-90-6
	Trilead dioxide phosphonate	12141-20-7
	Fatty acids, C16-18, lead salts	91031-62-8
	Sulfurous acid, lead salt, dibasic	62229-08-7
	Lead cyanamidate	20837-86-9
	Other Lead compounds	-
Mercury and its compounds (Hg)	Mercury	7439-97-6
	Mercury alloys; amalgam	-
	Mercury(Ⅰ)oxide	15829-53-5
	Mercury(II)oxide	21908-53-2
	Mercury(Ⅰ)chloride	10112-91-1
	Mercury(II)chloride	7487-94-7
	Mercury(II)nitrate	10045-94-0
	Mercury(Ⅰ)sulfate	7783-35-9
	Mercury(II)fulminate	628-86-4
	Mercury(II)acetate	1600-27-7
	Methylmercury salts	e.g. 22967-92-6
	Ethylmercury salts	-
	Propylmercury salts	-
	Phenylmercury salts	-
	Methoxyethyl-mercury salts	-
	Dialkylmercury	-
	Diphenylmercury	587-85-9
	Mercuric sulfide	1344-48-5
	Mercuric chloride	33631-63-9
	Other mercury compounds	-
Hexavalent chromium and its compounds (Cr6+)	Chromium trioxide	1333-82-0
	Lithium chromate	14307-35-8
	Sodium chromate	7775-11-3
	Potassium chromate	7789-00-6
	Potassium chlorochromate	16037-50-6
	Ammonium chromate	7788-98-9
	Copper chromate	13548-42-0
	Magnesium chromate	13423-61-5
	Calcium chromate	13765-19-0
	Strontium chromate	7789-06-2
	Barium Chromate	10294-40-3
	Lead chromate (Orange pigment)	1344-38-3
	Dichromium zinc tetraoxide	12018-19-8
	Zinc chromate	13530-65-9
	Zinc dichromate	14018-95-2
	Sodium dichromate	10588-01-9
	Sodium dichromate dihydrate	7789-12-0
	Ammonium dichromate	7789-09-5
	Calcium chromate	14307-33-6

	Chromic acid	7738-94-5
	Dichromic acid	13530-68-2
	Copper chromite	12053-18-8
	Zinc dichromate	14018-95-2
	Potassium dichromate	7778-50-9
	Other chromium compound	-
Polybrominated Biphenyl (PBBs)		
Monobromodiphenyl	2-Bromobiphenyl	2052-07-5
	3-bromobiphenyl	2113-57-7
	Monobromobiphenyl (mixed isomers)	26264-10-8

Annex II. (Article 6) List of Environmental Substances in Packaging Materials

Substance name	Target	Substance name	CAS no.
Cadmium, lead, mercury, Hexavalent chromium	Packaging materials shipped to market	See Annex I B. List of RoHS Substances	-
Ozone-depleting substances (ODS)	Packaging materials shipped to market	See Annex I A. List of Restricted Substances	-
PVC	Packaging materials shipped to market	Polyvinyl Chloride (PVC)	93050-82-9
		Polyvinyl Chloride (PVC)	9002-86-2
		Polyvinylidene Chloride (PVDC)	9002-85-1
		Polyvinylimidazolinium Chloride (PVC)	81517-61-5
		Other PVC compounds	-
Brominated flame retardant	Packaging materials shipped to market	Bis(2,4,6-tribromophenyl) carbonate	67990-32-3
		Brominated trimethylphenyl-lindane	59789-51-4
		Bromo dichloromethane	75-27-4
		Bromo-/Chloro-alpha-olefin	82600-56-4
		Bromo-/Chloro-paraffins	68955-41-9
		Chlorinated and brominated phosphate ester	125997-20-8
		Decabromo-diphenyl-ethane	84852-53-9
		Dibromo-neopentyl-glycol	3296-90-0
		Dibromo-propanol	96-13-9
		Dibromo-styrene grafted PP	171091-06-8
		Ethylene-bis(5,6-dibromo-norbornane-2,3-dicarboximide)	52907-07-0
		N,N'-Ethylene –bis-(tetrabromo-phthalimide)	32588-76-4
		Pentabromo-benzyl bromide	38521-51-6
		Pentabromo-benzyl-acrylate, monomer	59447-55-1
		Pentabromo-benzyl-acrylate, polymer	59447-57-3
		Pentabromo-phenol	608-71-9
		Pentabromo-toluene	87-83-2
		Poly(2,6-dibromo-phenylene oxide)	69882-11-7
		Poly-dibromo-styrene	31780-26-4
		TBBS-bis-(2,3-dibromo-propyl-ether)	42757-55-1
		TBPA Na salt	25357-79-3
		TBPA, glycol-and propylene-oxide esters	75790-69-1
		Tetrabromo phthalic anhydride(TBPA)	632-79-1
		Tetrabromo-bisphenol S	39635-79-5
		Tetrabromo-cyclo-octane	31454-48-5
		Tetra-decabromo-diphenoxy-benzene	58965-66-5
		Tribromo-neopentyl-alcohol	36483-57-5
		Tribromo-phenyl-allyl-ether, unspecified	26762-91-4

		Tribromo-styrene	61368-34-1
		Tris-(2,3-dibromo-propyl)-isocyanurate	52434-90-9
		Tris(2,4-Dibromo-phenyl) phosphate	49690-63-3
		Tris(tribromo-neopentyl) phosphate	19186-97-1
		Vinyl bromide	593-60-2
		TBBA bis-(2-hydroxy-ethyl-ether)	4162-45-2
		TBBA carbonate oligomer	28906-13-0
		TBBA carbonate oligomer, 2,4,6-tribromo-phenol terminated	71342-77-3
		TBBA carbonate oligomer, phenoxy end capped	94334-64-2
		TBBA-(2,3-dibromo-propyl-ether)	21850-44-2
		TBBA, unspecified	30496-13-0
		TBBA-bis-(allyl-ether)	25327-89-3
		TBBA-bisphenol A-phosgene polymer	32844-27-2
		TBBA-dimethyl-ether	37853-61-5
		TBBA-epichlorhydrin oligomer	40039-93-8
		TBBA-TBBA-diglycidyl-ether oligomer	70682-74-5
		TBBA, 2,2-Bis(4-(2,3-Epoxypropyloxy)dibromophenyl) propane polymer	68928-70-1
		TBBA-polycarbonate	156042-31-8
		Other Brominated Flame Retardants	-
Cobalt dichloride	Silica gel, humidity indicator	Cobalt dichloride	7646-79-9
